1.0 Executive Summary

An Environmental Site Assessment (ESA) Screening has been prepared by American Structurepoint for two study areas in Fairfield, Butler County, Ohio. These study areas are being investigated as part of a proposed project to construct a grade separation for the Symmes Road railroad crossing and to improve and/or close the North Gilmore Road railroad crossing. The study areas are identified as Symmes Road Crossing and Gilmore Road Crossing, respectively. Four alternatives, Alternatives 1, 2, 3, and 4, have been developed for the proposed Symmes Road Crossing study area. However, Alternative 1 was dismissed and was not assessed as part of this screening.

This ESA Screening was completed to determine the likelihood of hazardous substances within the study areas. A mapping review, a regulatory database review, and a site inspection from existing right-of-way of the study areas were completed as part of the ESA Screening.

1.1 Gilmore Road Crossing

Historically, the study area was identified as primarily agricultural land with residential development occurring after 1938 and industrial and commercial development occurring after 1962. A database search of appropriate federal and state records was performed by Historical Information Gatherers (HIG) on April 30, 2024. Several regulatory records were identified in the HIG report that would impact the proposed project. A site visit to the study area was completed on July 1, 2024. Table 1 identifies sites for which a Phase I ESA may be required based on the study area included in the ESA Screening assessment. The Phase I ESA recommendations are based on preliminary findings and the selected alternative may impact the number of Phase I ESA studies needed.

Table 1. Gilmore Road Crossing: Phase I ESA Recommendation Summary

Site No.	Tenant/Owner Address/Location Description	Phase I ESA Recommended (Y/N)	Reason for Phase I ESA Recommendation
1	M Bohlke Veneer Corp 3001 Symmes Road	Y	Current high-risk land use (industrial); Environmental record listing (Ohio Division of Environmental Response and Revitalization Database; Ohio Voluntary Cleanup Program)
2	Timothy Lee Anderson TR 8525 N Gilmore Road	Y	Historic high-risk land use (truck servicing); Environmental record listing (Leaking Underground Storage Tank)
3	MC Tank Transport Inc. 8555 N Gilmore Road	Y	Current high-risk land use (Bulk Liquids Transportation); Environmental record listing (Underground Storage Tank/Leaking Underground Storage Tank)
4	Gilmore & Symmes Properties LLC 8550 N Gilmore Road	N	
5	Baltimore & Ohio Railroad Symmes Road	N	

Table 1. Gilmore Road Crossing: Phase I ESA Recommendation Summary

Site No.	Tenant/Owner Address/Location Description	Phase I ESA Recommended (Y/N)	Reason for Phase I ESA Recommendation
6	Mount Clare Properties Inc. N Gilmore Road	N	
7	J & J Fairfield Properties LLC 8657 N Gilmore Road	Y	Current high-risk land use (Vehicle Servicing)
8	Suburban Propane 8671 N Gilmore Road	N	
9	Lola M Walters 8681 N Gilmore Road	N	
10	Kenneth Boehm/Motor Car Co, Inc. 8691 N Gilmore Road	Y	Current high-risk land use (Vehicle Servicing)
11	Fairfield Freshman School 8790 N Gilmore Road	N	

1.2 Symmes Road Crossing

Historically, the study area was identified as primarily agricultural and residential land with industrial, commercial, and further residential development occurring after 1938. A database search of appropriate federal and state records was performed by HIG on April 30, 2024. HIG performed an additional database search of appropriate federal and state records on January 9, 2025, for the expanded study area along Veterans Drive and Hicks Boulevard. Several regulatory records were identified in the HIG report that would impact the proposed project. Site visits of the study area were completed on July 1, 2024, and February 3, 2025. Table 2 identifies sites for which a Phase I ESA may be required based on the study area included in the ESA Screening assessment. The Phase I ESA recommendations are based on preliminary findings and the selected alternative may impact the number of Phase I ESA studies needed.

Table 2. Symmes Road Crossing: Phase I ESA Recommendation Summary

Site No.	Tenant/Owner Address/Location Description	Phase I ESA Recommended (Y/N)	Reason for Phase I ESA Recommendation
12	First National Bank of Southwest Ohio 4601 Dixie Hwy	Y	Historic high-risk land use (Gas Station)
13	Five Star Gas Inc. 4600 Dixie Hwy	Y	Current high-risk land use (Gas Station); Environmental record listing (Underground Storage Tank/Leaking Underground Storage Tank)

2.0 Introduction

An ESA Screening has been prepared by American Structurepoint for the Symmes Road Grade Separation project in Fairfield, Butler County, Ohio. The ESA Screening was completed to determine the likelihood of hazardous substances within the Symmes Road Crossing and Gilmore Road Crossing study areas. Historic and current land-use information and regulatory databases were reviewed to identify areas that may require additional environmental assessment. Site inspections for the study areas were performed on July 1, 2024, and February 3, 2025. The weather on July 1, 2024, was mostly sunny with a temperature of approximately 80 degrees Fahrenheit. The weather on February 3, 2025, was mostly sunny with a temperature of approximately 50 degrees Fahrenheit.

2.1 Gilmore Road Crossing

The Gilmore Road Crossing study area is located approximately 0.16 miles south of Symmes Road and extends south along Gilmore Road for approximately 0.31 miles.

The study area is in a primarily commercial setting and includes industrial, commercial, residential, forested, agricultural, and educational properties. The local topography is generally gently rolling.

Existing ground elevation is approximately 630 feet above mean sea level (amsl). Groundwater flow is generally to the west; however, local features may influence hydrogeological factors in a specific location.

The soils within the study area include the following: Brenton silt loam (Bt, 0 to 2 percent slopes), Tippecanoe silt loam (TpA, 0 to 2 percent slopes), Urban land-Brenton complex (UBt, 0 to 2 percent slopes), Urban land-Ockley, Southern Ohio Tilll Plain, complex (UOcB, 2 to 6 percent slopes), and Urban land-Tippecanoe complex (UTpA, 0 to 2 percent slopes) (SSURGO Database, Accessed May 28, 2024). Additionally, the study area is within the Southern Ohio Loamy Till Plain Region (Brockman 1998). This physiographic region is characterized by a surface of loamy till, end and recessional moraines cut by steep-valleyed large streams, stream valleys that are filled with outwash and alternate between broad floodplains and narrows, buried valleys, elevations of 530 feet to 1150 feet, and moderate relief (200 feet).

2.2 Symmes Road Crossing

The Symmes Road Crossing study area is approximately 1.3 miles along Symmes Road between State Route 4 and North Gilmore Road. The Symmes Road study area also extends 0.15 miles along Industry Drive, 0.14 miles along Tedia Way, 0.21 miles along Veteran Drive, and 0.18 miles along Hicks Boulevard and includes portions of adjacent properties.

The study area is in a primarily commercial and industrial setting and includes industrial, commercial, residential, religious, and forested properties. The local topography is generally gently rolling.

Existing ground elevation is approximately 610 feet amsl. Groundwater flow is generally to the west; however, local features may influence hydrogeological factors in a specific location.

The soils within the study area include the following: Miamian-Russel silt loam (MsC2, 6 to 12 percent slopes), Patton silty clay loam (Pa, 0 to 2 percent slopes), Udorthents (Ud, this soil is highly variable), Urban land-Eldean complex (UEIA, 0 to 2 percent slopes), Urban land-Eldean complex (UEIB2, 2 to 6 percent slopes), Urban land-

Eldean complex (UEuB, 2 to 6 percent slopes), Udorthents and Dumps (Uf, these soils have been heavily modified), Urban land-Fincastle, Southern Ohio Till Plain, complex (UFcA, 0 to 2 percent slopes), Urban land-Fincastle, Southern Ohio Till Plain, complex (UFcB, 2 to 4 percent slopes), Urban land-Eldean complex (UpA, 0 to 2 percent slopes), Urban land-Raub complex (URdA, 0 to 2 percent slopes), Urban land-Russel-Miamian complex (URvB, 2 to 6 percent slopes), Urban land-Xenia, Southern Ohio Till Plain, complex (UXeB, 2 to 6 percent slopes), Xenia silt loam, Southern Ohio Till Plain (XeB, 2 to 6 percent slopes) (SSURGO Database, Accessed May 28, 2024). Additionally, the study area is within the Southern Ohio Loamy Till Plain Region (Brockman 1998). This physiographic region is characterized by a surface of loamy till, end and recessional moraines cut by steep-valleyed large streams, stream valleys that are filled with outwash and alternate between broad floodplains and narrows, buried valleys, elevations of 530 feet to 1150 feet, and moderate relief (200 feet).

3.0 Mapping Review

3.1 Gilmore Road Crossing

Historical aerial photography, as available from HIG (2024), was reviewed for the study area and surrounding areas from 1938 to 2023. Copies of the historical aerial photographs are included in Appendix B of this report and summarized in Table 3.

Table 3. Gilmore Road Crossing: Historical Aerial Photography Summary

Year (s)	Scale	Description
1938	1: 6000	The study area appeared to be located in an agricultural area. The study area consisted of agricultural fields and features a road and a railroad.
1950	1: 6000	Residential structures appeared to be constructed adjacent to the study area to the south and west. Additional tracks appeared to have been added to the railroad.
1956	1: 6000	Additional residential structures appeared to have been constructed adjacent to the study area to the south and west.
1962	1: 6000	The study area and adjacent areas appeared similar to the previous aerial.
1968	1: 6000	An industrial structure appeared to be constructed adjacent to the study area to the northwest. One of the properties within the southwest border of the study area appeared to transition to commercial use.
1974	1: 6000	This is a poor-quality photo. From what is visible, the study area and adjacent areas appeared similar to the previous aerial.
1977	1:6000	The study area appeared similar to the previous aerial. Industrial and commercial properties continued to develop in the surrounding area.
1980	1: 6000	The area within and adjacent to the northwest corner of the study area appeared to be developed for commercial purposes. Additional properties within and adjacent to the southwestern border of the study area appeared to transition to commercial uses.
1984	1: 6000	An additional commercial structure appeared to be constructed adjacent to the study area to the west.
1994	1: 6000	The study area and adjacent areas appeared similar to the previous aerial.
2000	1: 6000	Additional roads appeared to be constructed within the study area. A school appeared to have been constructed adjacent to the study area to the southeast.
2004	1: 6000	The study area and adjacent areas appeared similar to the previous aerial.

Table 3. Gilmore Road Crossing: Historical Aerial Photography Summary

Year (s)	Scale	Description
2009	1: 6000	A property within and adjacent to the southwest side of the study area appeared to transition to commercial use.
2013	1: 6000	The study area and adjacent areas appeared similar to the previous aerial.
2017	1: 6000	The study area appeared similar to the previous aerial. An additional building appeared to be added to the school adjacent to the study area to the southeast.
2023	1:6000	The study area and adjacent areas appeared similar to the previous aerial.

Historical USGS topographic maps were reviewed for the years 1915, 1917, 1955, 1965, 1974, 1981, 2010, 2013, 2016, and 2019. According to the 7.5-minute quadrangles, the study area was depicted as cleared land featuring a road and railroad from 1915. The surrounding area was depicted developing over time from 1955 to 1981. Copies of the historical USGS topographic maps as available from HIG, are included in Appendix B.

3.2 Symmes Road Crossing

Historical aerial photography, as available from HIG (2024), was reviewed for the study area and surrounding areas from 1938 to 2023. Copies of the historical aerial photographs are included in Appendix F of this report and summarized in Table 4.

Table 4. Symmes Road Crossing: Historical Aerial Photography Summary

Year (s)	Scale	Description
1938	1: 6000	The study area appeared to be in a primarily agricultural and residential area. The study area consisted of agricultural fields and featured a road and a railroad.
1950	1: 6000	A large industrial structure appeared to be constructed adjacent to the study area to the north. Additional tracks appeared to have been added to the railroad.
1956	1: 6000	The study area appeared similar to the previous aerial. A commercial structure appeared to be constructed adjacent to the study area to the west.
1962	1: 6000	Several small residential or commercial structures appeared to be constructed within the study area and adjacent to the study area to the south. An electric substation appeared to be constructed adjacent to the study area to the south. Large areas of soil disturbance for construction activities appeared within the study area and adjacent to it to the south.
1968	1: 6000	Industrial structures appeared to be constructed adjacent to the study area to the south and east. Additional small residential or commercial structures appeared to be constructed within the study area and adjacent to the study area to the south.
1974	1: 6000	This is a poor-quality photo. From what is visible, the study area and adjacent areas appeared similar to the previous aerial.
1977	1:6000	The study area and adjacent areas continued to be developed for commercial and industrial use.
1984	1: 6000	Additional industrial structures were constructed within the study area and adjacent to the study area to the north, east, and south.
1988	1: 6000	A large area of soil disturbance is visible adjacent to the study area to the north.
1994	1: 6000	Additional industrial and commercial structures appeared to be constructed within the study area and adjacent to the study area to the north and south.

Table 4. Symmes Road Crossing: Historical Aerial Photography Summary

Year (s)	Scale	Description
2000	1: 6000	Additional industrial and commercial structures appeared to be constructed within the study area and adjacent to the study area to the north and south. The area of soil disturbance located adjacent to the study area to the north appeared to be expanded.
2004	1: 6000	The study area and adjacent areas appeared similar to the previous aerial.
2009	1: 6000	An additional commercial structure appeared to be constructed within the study area. An additional industrial structure appeared to be constructed adjacent to the study area to the north.
2013	1: 6000	The study area appeared similar to the previous aerial. A religious structure appeared to be constructed adjacent to the study area to the south.
2017 2023	1: 6000	The study area and adjacent areas appeared similar to the previous aerial.

Historical USGS topographic maps were reviewed for the years 1915, 1917, 1955, 1965, 1974, 1981, 2010, 2013, 2016, and 2019. According to the 7.5-minute quadrangles, the study area was depicted as cleared land featuring a road and railroad from 1915. The surrounding area was depicted developing over time from 1955 to 1981. Copies of the historical USGS topographic maps as available from HIG, are included in Appendix F.

4.0 Regulatory Database Review

This section presents the findings of the secondary source review to identify hazardous material/hazardous waste handlers or generators within the study area.

4.1 Gilmore Road Crossing

A search of nationwide and local database sources, both current and historic, was provided by HIG on April 30, 2024. A copy of that report is included in Appendix C of this report and is summarized in Table 5.

Table 5. Gilmore Road Crossing: Standard Federal, State, and Tribal Environmental Records

Standard Environmental Record	Minimum Search Distance (miles)	Total Sites Within Search Distance
Federal National Priorities List (NPL)	1.0	0
Federal Delisted NPL	0.5	0
Federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)	0.5	0
Federal CERCLA sites with No Further Remedial Action Planned (NFRAP)	0.5	1
Federal Resource Conservation and Recovery Act (RCRA) undergoing Corrective Action (CORRACTS)	1.0	2
Federal RCRA non-CORRACTS Treatment, Storage, and Disposal (TSD)	0.5	2
Federal RCRA Generators	Study Area and Adjoining	7
Federal Institutional Control/Engineering Control	Study Area	0
Federal Emergency Response Notification System (ERNS)	Study Area	0
Federal Brownfields Management System	0.5	0
State Division of Environmental Response and Revitalization Database (Ohio DERR)	0.5	3
State and Tribal Landfill and/or Solid Waste Disposal	0.5	0
State and Tribal Leaking Underground Storage Tanks (LUST)	0.5	14
State and Tribal Underground Storage Tanks (UST)	Study Area and Adjoining	1
State and Tribal institutional Control/Engineering Control (IC/EC)	Study Area	0
State and Tribal Voluntary Cleanup Sites (VCP)	0.5	1
State and Tribal Brownfields	0.5	0

The following table summarizes the environmentally regulated sites that are in relatively close proximity to the study area. Additional sites included in the database report that are not discussed below are not considered to pose any significant environmental threat to the study area. Additionally, sites located at a lower relative elevation and have groundwater flow away from the study area are not discussed below due to their unlikelihood of affecting the study area. See maps in Appendix A for locations of the following sites.

Table 6. Gilmore Road Crossing: Environmentally Regulated Sites

Site Name and Address	Environmental Record	Listed in Study Area (Y/N)	Listed Adjacent to Study Area (Y/N)
MC Tank Transport Inc. 8555 N Gilmore Road	**UST** – 1,000-gallon containing diesel. **LUST** – A regulated UST was closed and has a No Further Action status.	Y	
Coastal Tank Lines Inc. 8525 Gilmore Road	**RCRA** – Non-generator with no violations.	Y	
Robinson & Son 8525 N Gilmore Road	**LUST** – The UST was closed and the release has a No Further Action Status.	Y	
Gilmore Auto Body 8701 N Gilmore Road	**RCRA** – Non-generator and prior small-quantity generator with no violations.	N	Y
Brock & Sons, Inc. 8731 N Gilmore Road	**LUST** – A release occurred on December 28, 1994. The UST was closed and the release has a No Further Action status.	N	N
Wright-Bernet Inc. 3001 Symmes Road	**Ohio DERR** – This site was involved in a site assessment and voluntary action program. **IC and VCP** – The site is restricted to commercial and industrial use. Groundwater may not be extracted except for investigation, monitoring, or remediation.	N	Y
Midwest Environmental Transport 2975 Symmes Road	**RCRA** – Non-generator and prior large-quantity generator. Site had four violations in 1991 for which compliance was achieved by 1993.	N	N
GE Engine Services Inc. 3024 Symmes Road	**RCRA CORRACTS** – On March 28, 1990, an RCRA Facilities Assessment was completed. On December 31, 1991, this site was identified as a low corrective action priority. On May 1, 2009, the site was given a determination that further investigation was "not necessary." **RCRA** – Non-generator and prior small and large quantity generator. This site had 10 violations between 1985 and 2006 for which compliance was achieved between 1985 and 2006. **RCRA Treatment Storage and Disposal Facility (TSDF)** – Storage facility.	N	N

4.2 Symmes Road Crossing

A search of nationwide and local database sources, both current and historic, was provided by HIG on April 30, 2024. A copy of that report is included in Appendix G of this report and is summarized in Table 7.

Table 7. Symmes Road Crossing: Standard Federal, State, and Tribal Environmental Records

Standard Environmental Record	Minimum Search Distance (miles)	Total Sites Within Search Distance
Federal National Priorities List (NPL)	1.0	0
Federal Delisted NPL	0.5	0
Federal Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)	0.5	0
Federal CERCLA sites with No Further Remedial Action Planned (NFRAP)	0.5	1
Federal Resource Conservation and Recovery Act (RCRA) undergoing Corrective Action (CORRACTS)	1.0	3
Federal RCRA non-CORRACTS Treatment, Storage, and Disposal (TSD)	0.5	3
Federal RCRA Generators	Study Area and Adjoining	12
Federal Institutional Control/Engineering Control	Study Area	0
Federal Emergency Response Notification System (ERNS)	Study Area	2
Federal Brownfields Management System	0.5	0
State Division of Environmental Response and Revitalization Database (Ohio DERR)	0.5	3
State and Tribal Landfill and/or Solid Waste Disposal	0.5	0
State and Tribal Leaking Underground Storage Tanks (LUST)	0.5	27
State and Tribal Underground Storage Tanks (UST)	Study Area and Adjoining	1
State and Tribal institutional Control/Engineering Control (IC/EC)	Study Area	0
State and Tribal Voluntary Cleanup Sites (VCP)	0.5	1
State and Tribal Brownfields	0.5	0

The following table summarizes the environmentally regulated sites that are located in relatively close proximity to the study area. Additional sites included in the database report that are not discussed below are not considered to pose any significant environmental threat to the study area. Additionally, sites located at a lower

relative elevation and have groundwater flow away from the study area are not discussed below due to their unlikelihood of affecting the study area. See maps in Appendix E for locations of the following sites.

Table 8. Symmes Road Crossing: Environmentally Regulated Sites

Site Name and Address	Environmental Record	Listed in Study Area (Y/N)	Listed Adjacent to Study Area (Y/N)
Nor Am Chemical Co. 4650 Industry Dr	**RCRA** – Very small-quantity generator with no violations.	Y	
Southern Ohio Trucklines, Inc. 1485 Symmes Rd	**LUST** – A UST at this site caused a release on June 1, 1992. This release has a Tier 1 Source Investigation status. **RCRA** – Non-generator and prior small-quantity generator with no violations.	Y	
Auto Fix Inc. 2720 B Symmes Rd	**RCRA** – Non-generator and prior small-quantity generator with no violations.	Y	
Steel Abrasives Inc. 2727 Symmes Rd	**CERCLIS-NFRAP** – On August 1, 1984, a preliminary assessment was completed, and the site was determined not to qualify for the NPL based on the existing information. **RCRA CORRACTS** – An RCRA Facility Assessment was completed on October 12, 1988. The site was designated a high corrective action priority on August 24, 1991. Human exposure and groundwater release controls were set in place. On September 8, 2014, the site was determined to be ready for anticipated use and on September 9, 2014, the corrective action process was terminated and the site was given a no further action status. **Ohio DERR** – This site has been involved in a site assessment. **RCRA** – Non-generator and prior large-quantity generator with no violations. The site is an RCRA Land Disposal site.	Y	
Tedia Company Inc. 1000 Tedia Way (Previously 2880 Symmes Rd)	**Ohio DERR** – This site has been involved in a site assessment. **ERNS** - On September 13, 2008, there was an incident in which approximately 3,564 pounds of 1.4-dioxane vapor were released at the site. On April 10, 2015, a caller reported a release of chloroform to the atmosphere due to unknown causes. On June 27, 2016, there was a release of 44 pounds of chloroform UN1888 to the atmosphere. **RCRA** – Large quantity generator of ignitable waste, corrosive waste, mercury, benzene, chlorobenzene, 1,2-dichloroethane, methyl ethyl ketone, pyridine, spent nonhalogenated solvents, and the still bottoms from the recovery of spent solvents and spent solvent mixtures. This site has had eight violations.	Y	

Table 8. Symmes Road Crossing: Environmentally Regulated Sites

Site Name and Address	Environmental Record	Listed in Study Area (Y/N)	Listed Adjacent to Study Area (Y/N)
American Fan Co. 2933 Symmes Rd	**RCRA** – Small-quantity generator and prior large-quantity generator of ignitable waste, barium, cadmium, chromium, lead, benzene, methyl ethyl ketones, tetrachloroethylene, spent nonhalogenated solvents, and still bottoms from the recovery of spent solvents and spent solvent mixtures. This site has had five violations.	Y	
M Bohlke Manufacturing Corp. 2904 Symmes Rd	**LUST** – A UST has been closed at this site and has a no further action status from BUSTR. **RCRA** – Non-generator and prior small-quantity generator with no violations.	Y	
Midwest Environmental Transport 2975 Symmes Rd	**RCRA** – Non- generator and former large-quantity generator. This site had four violations.	Y	
W & W Tank Cleaners 2989 Symmes Rd	**RCRA** – Non-generator and prior small-quantity generator with no violations.	Y	
BW OH Dixies Symmes 4597 Dixie Hwy	**LUST** – A UST has been closed at this site.	Y	
N/R 1396 Hicks Blvd	**ERNS** – There was an incident in which a transformer hit the ground and released approximately 40 gallons of mineral oil and polychlorinated biphenyls. Approximately five gallons reached a storm drain. The record indicates a clean-up was underway.	N	Y
Shell Dixie Hwy 4600 Dixie Hwy	**LUST** – This site is a gas station. A suspected contamination was documented on June 20, 2000. The date of this release is unknown. This contamination has a no further action status from BUSTR. There was an additional release documented on June 20, 2000, for which the date of release is unknown. The UST associated with this release has been closed and the release has received a no further action status from BUSTR. A third release occurred on April 1, 2003, which has received a no further action status. A fourth release occurred on April 18, 2019. The UST associated with this release has been closed and the release has received a no further action status from BUSTR. **UST** – There is a 6,000-gallon UST containing diesel, a 15,000-gallon UST containing gasoline, a 6,000-gallon UST containing gasoline, and a 4,000-gallon UST containing kerosene currently in use at this site.	N	Y
Field Maintenance Shop #11 3000 Symmes Rd	**RCRA** – Very small-quantity generator with no violations.	N	Y

Table 8. Symmes Road Crossing: Environmentally Regulated Sites

Site Name and Address	Environmental Record	Listed in Study Area (Y/N)	Listed Adjacent to Study Area (Y/N)
State of Ohio Quartermaster 3000 Symmes Rd	**RCRA** – Very small-quantity generator with no violations.	N	Y
Wright-Bernet Inc. 3001 Symmes Rd	**Ohio DERR** – This site was involved in a site assessment and voluntary action program. **IC and VCP** – The site is restricted to commercial and industrial use. Groundwater may not be extracted except for investigation, monitoring, or remediation.	N	Y
GMC Fisher Body Division Hamilton Plant 4400 Dixie Hwy	**RCRA CORRACTS** – On February 10, 1992, an RCRA Facilities Assessment was completed for this site. On March 12, 1992, this site was determined to be not amenable to stabilization. On March 31, 1992, this site was identified as a low corrective action priority. On May 1, 2009, the site was given a determination of need for further investigation of "not necessary." This is an RCRA treatment and storage facility.	N	Y
Bonbright Electric Corp 1370 Hicks Blvd	**LUST** – There was a release on August 17, 2004. The UST associated with this release has been closed and the release has received a no further action status.	N	Y
Biff's Auto Body & Paint Shop 1311 Hicks Blvd	**RCRA** – Very small-quantity generator with no violations.	N	Y

5.0 Site Reconnaissance

5.1 Gilmore Road Crossing

A site inspection of the study area was conducted on July 1, 2024, to identify land-use features or other areas that indicated a potential for contamination by hazardous substances. Features indicative of hazardous material/waste handling, storage, or disposal include surface staining, USTs, aboveground storage tanks, surface lagoons, soil disturbance, drums, distressed vegetation, etc. All observations were made from within the existing right-of-way. Photographs were taken of the study area documenting general site characteristics and are included in Appendix D (Photographs 1-29). Table 9 provides a summary of the sites identified in the study area during the site inspection. Single-family residences and agricultural land are grouped together when possible.

Table 9. Gilmore Road Crossing: Sites Identified During the Visual Inspection of the Study Area

5.2 Symmes Road Crossing

Site inspections of the study area were conducted on July 1, 2024 and February 3, 2025, to identify land-use features or other areas that indicated a potential for contamination by hazardous substances. Features indicative of hazardous material/waste handling, storage, or disposal include surface staining, USTs, aboveground storage tanks, surface lagoons, soil disturbance, drums, distressed vegetation, etc. All observations were made from within the existing right-of-way. Photographs were taken of the study area documenting general site characteristics and are included in Appendix H (Photographs 1-84). Table 10 provides a summary of the sites identified in the study area during the site inspection. Single-family residences and agricultural land are grouped together when possible.

6.0 Conclusions and Recommendations

An ESA Screening has been prepared by American Structurepoint for two study areas in Fairfield, Butler County, Ohio. These study areas are being investigated as part of a proposed project to construct a grade separation for the Symmes Road railroad crossing and to improve and/or close the North Gilmore Road railroad crossing. The ESA Screening was completed to determine the likelihood of hazardous substances within the Gilmore Road Crossing and Symmes Road Crossing study areas. A mapping review, a regulatory database review, and a site inspection of the study areas were completed as part of the ESA Screening.

6.1 Gilmore Road Crossing

Table 11 identifies sites for which a Phase I ESA may be required based on the study area included in the ESA Screening assessment. The Phase I ESA recommendations are based on preliminary findings and the alternative selected may impact the number of Phase I ESA studies needed.

Table 11. Gilmore Road Crossing: Phase I ESA Recommendation Summary

Site No.	Tenant/Owner Address/Location Description	Phase I ESA Recommended (Y/N)	Reason for Phase I ESA Recommendation
1	M Bohlke Veneer Corp 3001 Symmes Road	Y	Current high-risk land use (Industrial); Environmental record listing
2	Timothy Lee Anderson TR 8525 N Gilmore Road	Y	Historic high-risk land use (Truck servicing); Environmental record listing (Leaking Underground Storage Tank)
3	MC Tank Transport Inc. 8555 N Gilmore Road	Y	Current high-risk land use (Bulk Liquids Transportation); Environmental record listing (Underground Storage Tank/Leaking Underground Storage Tank)
4	Gilmore & Symmes Properties LLC 8550 N Gilmore Road	N	
5	Baltimore & Ohio Railroad Symmes Road	N	
6	Mount Clare Properties Inc. N Gilmore Road	N	
7	J & J Fairfield Properties LLC 8657 N Gilmore Road	Y	Current high-risk land use (Vehicle Servicing)
8	Suburban Propane 8671 N Gilmore Road	N	
9	Lola M Walters 8681 N Gilmore Road	N	
10	Kenneth Boehm/ Motor Car Co, Inc. 8691 N Gilmore Road	Y	Current high-risk land use (Vehicle Servicing)
11	Fairfield Freshman School 8790 N Gilmore Road	N	

6.2 Symmes Road Crossing

Table 12 identifies sites for which a Phase I ESA may be required based on the study area included in the ESA Screening assessment. The Phase I ESA recommendations are based on preliminary findings and the selected alternative may impact the number of Phase I ESA studies needed.

Table 12. Symmes Road Crossing: Phase I ESA Recommendation Summary

Site No.	Tenant/Owner Address/Location Description	Phase I ESA Recommended (Y/N)	Reason for Phase I ESA Recommendation
12	First National Bank of Southwest Ohio 4601 Dixie Hwy	Y	Historic high-risk land use (Gas Station)

67	International Christian Fellowship Centre 1367 Hicks Blvd	N	

Sites recommended for completion of a Phase I ESA were further identified within and adjacent to the construction limits of each Symmes Road Crossing alternative. These sites are listed in Table 13. Sites listed in bold are considered to pose the greatest risk for impacts associated with hazardous substances based on the presence of RCRA CORRACTS, NFRAP, Ohio DERR, or Ohio VCP record listings at these sites. Sites not located in the immediate vicinity of any design alternative and sites for which the ESA Screening process did not reveal hazardous materials concerns justifying completion of a Phase I ESA are not included in Table 13. Mapping for each alternative is provided in Appendix E.

7.0 Environmental Professional Statement

7.1 Signature of the Environmental Professional

I declare, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312, and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the study area.

Richard M. Paul

7.2 Qualifications of the Environmental Professional

Mr. Paul has a Bachelor of Science in Natural Resources from The Ohio State University. He has been involved in professional environmental analysis since 2006, including Phase I and Phase II Environmental Site Assessments.

Ms. Hagerty has a Bachelor of Science in Environmental Science from Xavier University. She has been involved in professional environmental analysis since 2024, including Phase I and Phase II Environmental Site Assessments.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :	Minnesota's permitting, compliance, and enforcement information management system. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Hazardous Waste Details

Waste Code :	CORROSIVE WASTE
Quantity of Waste :	55
Units of Quantity :	Gallons (liquids only)
Number of Containers :	1
Type of Container :	Fiberboard or plastic drums, barrels, kegs
Handling Method :	Chemical, physical, or biological treatment
Specific Gravity :	01.00

Waste Code :	DISSOLVED AIR FLOTATION (DAF) FLOAT FROM THE PETROLEUM REFINING INDUSTRY.
Quantity of Waste :	275
Units of Quantity :	Gallons (liquids only)
Number of Containers :	5
Type of Container :	Metal drums, barrels, kegs
Handling Method :	Incineration, heat recovery, burning
Specific Gravity :	01.00

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

Minnesota's permitting, compliance, and enforcement information management system.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

FRS ***(cont.)***

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FRS ***(cont.)***

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
The Superfund Enterprise Management System (SEMS) integrates multiple legacy systems into a comprehensive tracking and reporting tool, providing data on the inventory of active and archived hazardous waste sites evaluated by the Superfund program. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

OTHER ASCERTAINABLE RECORDS (cont.)

PFAS WQP: List of PFAS from Water Quality Portal

Agency Version Date: 01/22/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 07/12/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 04/17/2024

PRISONS: List of Prison facilities

Agency Version Date: 08/17/2023
Agency Update Frequency: Varies
Planned Next Contact: 05/03/2024
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 02/07/2024

RAATS: Listing of major violators with enforcement actions issued under RCRA. Includes administrative and civil actions filed by the EPA. This dataset is no longer maintained.

Agency Version Date: 09/23/2019
Agency Update Frequency: Varies
Planned Next Contact: 06/07/2024
Agency: Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 03/13/2024

RADINFO: EPA regulated facilities with radiation and radioactive materials

Agency Version Date: 08/01/2019
Agency Update Frequency: Varies
Planned Next Contact: 05/28/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 03/01/2024

RMP: Facilities producing/handling/ process/ distribute/ store specific chemicals report plans required by the Clean Air Act

Agency Version Date: 06/14/2023
Agency Update Frequency: Monthly
Planned Next Contact: 05/27/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 564-2534
Most Recent Contact: 02/29/2024

ROD: Permanent remedy at an NPL site

Agency Version Date: 12/28/2023
Agency Update Frequency: Varies
Planned Next Contact: 06/19/2024
Agency: Environmental Protection Agency
Agency Contact: (800) 424-9346
Most Recent Contact: 03/25/2024

SCHOOLS PRIVATE: List of Private Schools

Agency Version Date: 03/14/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/10/2024
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 03/14/2024

SCHOOLS PUBLIC: List of Public Schools

Agency Version Date: 03/14/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/10/2024
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 03/14/2024

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners

Agency Version Date: 01/30/2024
Agency Update Frequency: No Update
Planned Next Contact: 07/22/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 04/25/2024

OTHER ASCERTAINABLE RECORDS (cont.)

SEMS_SMELTER: This report includes sites that have smelting-related, or potentially smelting-related, indicators in the SEMS database. The report includes information on the site location as well as contaminants of concern.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 03/25/2024

SSTS: Tracking of facilities who produce pesticides and their quantity

Agency Version Date: 05/18/2023
Agency Update Frequency: Annually
Planned Next Contact: 05/01/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 02/05/2024

STORMWATER: Permitted storm water sites

Agency Version Date: 02/14/2024
Agency Update Frequency: Varies
Planned Next Contact: 05/10/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 02/14/2024

TOSCA-PLANT: Plants controlled by the Toxic Substance Control Act

Agency Version Date: 08/22/2023
Agency Update Frequency: Varies
Planned Next Contact: 05/08/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 02/12/2024

TRIS: Information regarding toxic chemicals that are being used/manufactured/ treated/ transported/released into the environment

Agency Version Date: 02/21/2024
Agency Update Frequency: Varies
Planned Next Contact: 05/17/2024
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 02/21/2024

UMTRA: Uranium Recovery Sites

Agency Version Date: 08/31/2023
Agency Update Frequency: Varies
Planned Next Contact: 05/17/2024
Agency: United States Nuclear Regulatory Commission
Agency Contact: (301) 415-8200
Most Recent Contact: 02/21/2024

VAPOR: EPA Vapor Intrusion Database

Agency Version Date: 03/19/2021
Agency Update Frequency: Varies
Planned Next Contact: 05/01/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 855-246-3642
Most Recent Contact: 02/05/2024

AIRS - OH: Title V Permit listings

Agency Version Date: 06/08/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 05/20/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2270
Most Recent Contact: 02/22/2024

COAL ASH - OH: Sites with Coal Ash Disposal Facilities

Agency Version Date: 01/22/2018
Agency Update Frequency: Varies
Planned Next Contact: 05/08/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2782
Most Recent Contact: 02/12/2024

OTHER ASCERTAINABLE RECORDS (cont.)

COAL ASH 2 - OH: Sites with Coal Ash Disposal Facilities

Agency Version Date: 01/22/2018
Agency Update Frequency: Quarterly
Planned Next Contact: 05/08/2024
Agency: Ohio EPA
Agency Contact: 614) 644-2782
Most Recent Contact: 02/12/2024

CRO - OH: Cessation of Regulated Operations Facility Listing

Agency Version Date: 09/23/2022
Agency Update Frequency: Varies
Planned Next Contact: 05/22/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2621
Most Recent Contact: 02/26/2024

DAYCARE - OH: Daycare listing

Agency Version Date: 03/20/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/14/2024
Agency: Department of Job and Family Services
Agency Contact: (800) 686-1556
Most Recent Contact: 03/20/2024

DERR - OH: Sites listed in the DERR database

Agency Version Date: 01/25/2024
Agency Update Frequency: Varies
Planned Next Contact: 07/17/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2304
Most Recent Contact: 04/22/2024

DRYCLEANERS - OH: Sites with Drycleaners

Agency Version Date: 03/11/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/05/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2924
Most Recent Contact: 03/11/2024

HIST NPDES - OH: List of Industrial & Municipal water discharge permits that are no longer in current agency list.

Agency Version Date: 07/13/2018
Agency Update Frequency: Annually
Planned Next Contact: 06/21/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2001
Most Recent Contact: 03/27/2024

HIST USD - OH: Withdrawn sites

Agency Version Date: 03/22/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 06/18/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2924
Most Recent Contact: 03/22/2024

MINES - OH: List of Coal & Industrial Mine locations

Agency Version Date: 03/13/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/07/2024
Agency: Division of Mineral Resources Management
Agency Contact: N/R
Most Recent Contact: 03/13/2024

MINES 2 - OH: List of current & past Coal mine openings

Agency Version Date: 03/12/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/06/2024
Agency: Division of Mineral Resources Management
Agency Contact: N/R
Most Recent Contact: 03/12/2024

MINES AUM - OH: List of Abandoned Underground Mine locations

Agency Version Date: 03/15/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/11/2024
Agency: Division of Mineral Resources Management
Agency Contact: (330) 339-2207
Most Recent Contact: 03/15/2024

OTHER ASCERTAINABLE RECORDS (cont.)

NPDES - OH: Listing of facilities with wastewater and NPDES permits

Agency Version Date: 03/22/2024
Agency Update Frequency: Varies
Planned Next Contact: 06/18/2024
Agency: Ohio EPA
Agency Contact: (614) 644-2001
Most Recent Contact: 03/22/2024

PFAS - OH: List of wells in the statewide PFAS investigation

Agency Version Date: 01/05/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 06/27/2024
Agency: Ohio EPA and Ohio Department of Health
Agency Contact: (614) 644-2160
Most Recent Contact: 04/02/2024

SLUDGE - OH: Database of sludge pits, ponds and lagoon sites. The SIABASE data was published by US EPA in 1980.

Agency Version Date: 12/25/2017
Agency Update Frequency: No Longer Maintained

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI
National Wetland Inventory
U.S. Fish and Wildlife Service
(703) 358-2171
Wetland Inventory for the United States

SSURGO
Detailed Soil Data Map
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
Detailed Soil Data Map

STATSGO & MUI
General Soil Data Map
Natural Resources Conservation Service: U.S. Department of Agriculture
(202) 690-4985
General Soil Data Map

USGS GEOLOGIC AGE

(866) 835-5322
Airport landing facilities

BASINS
Better Assessment Science Integrating point & Non-point Sources
U.S. Environmental Protection Agency
855-246-3642
Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

DIGITAL OBSTACLE
Obstacles of interest to aviation users
Federal Aviation Administration
855-379-6518
The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

EPICENTERS
National Geographical Data Center
National Geographical Data Center
303-497-6826
List of recent and historic earthquakes and information.

FLOOD DFIRM
National Flood Hazard Layer Database
Federal Emergency Management Agency
The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMAs Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Hazardous Waste Summary

Waste Code / Name : D001 - IGNITABLE WASTE

Waste Code / Name : F003 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code / Name :

F001 - THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code / Name :

F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description : All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Waste Code / Name : D001 - IGNITABLE WASTE
D002 - CORROSIVE WASTE

Waste Code / Name : F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F010 - QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
F011 - SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.
F012 - QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
P030 - CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
P106 - SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)
U019 - BENZENE (I,T)
U043 - ETHENE, CHLORO- (OR) VINYL CHLORIDE

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	AQS contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Agency Version Date: 10/01/2024
Agency Update Frequency: Varies
Planned Next Contact: 03/24/2025
Agency: Ohio EPA
Agency Contact: (614) 752-7938
Most Recent Contact: 12/26/2024

FEDERAL RCRA NON-CORRACTS TSD FACILITIES LIST

ARCHIVED RCRA TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 11/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 02/04/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 11/08/2024

RCRA_TSDF: Resource Conservation and Recovery Act hazardous waste transportation storage disposal and treatment facilities

Agency Version Date: 11/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 02/04/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 215-814-2469
Most Recent Contact: 11/08/2024

FEDERAL CERCLIS LIST

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 09/13/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 12/10/2024

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 09/13/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 12/10/2024

EPA SAA: Listing of Sites with Superfund Alternative Approach Agreements.

Agency Version Date: 09/16/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/07/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 12/11/2024

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 09/13/2024
Agency Update Frequency: Varies
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 12/10/2024

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 09/13/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 12/10/2024

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 09/13/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 12/10/2024

FEDERAL RCRA CORRACTS FACILITIES LIST

CORRACTS: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases

Agency Version Date: 11/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 02/04/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 11/08/2024

HIST CORRACTS 2: List of facilities where Resource Conservation and Recovery Act Corrective Action Program used to investigate and remediate hazardous releases that are no longer in current agency list.

Agency Version Date: 10/12/2018
Agency Update Frequency: Annually
Planned Next Contact: 03/28/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 202-566-1667
Most Recent Contact: 01/01/2025

FEDERAL DELISTED NPL SITE LIST

DELISTED NPL: National Priority List of sites that were delisted and no longer require action

Agency Version Date: 09/13/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 12/10/2024

DELISTED PROPOSED NPL: Sites that have been delisted from the proposed National Priority List

Agency Version Date: 09/13/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/06/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 12/10/2024

Planned Next Contact: 03/31/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 01/02/2025

PFAS INDUSTRY: List of Industries potentially handling PFAS

Agency Version Date: 07/12/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/31/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 01/02/2025

PFAS MANIFEST: PFAS Transfer Manifest

Agency Version Date: 10/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/31/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 01/02/2025

PFAS NPL: List of NPL sites with PFAS or PFOA contamination

Agency Version Date: 08/23/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 02/13/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 11/19/2024

OTHER ASCERTAINABLE RECORDS (cont.)

PFAS PROD: PFAS Production Sites

Agency Version Date: 10/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/31/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 01/02/2025

PFAS SPILLS: List of PFAS Spill Sites

Agency Version Date: 10/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/31/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 01/02/2025

PFAS TRIS: List of TRIS sites where PFAS or PFOA are used/manufactured/ treated/ transported/released.

Agency Version Date: 08/13/2024
Agency Update Frequency: Varies
Planned Next Contact: 02/03/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 11/07/2024

PFAS UCMR3: List of PWS wells sampled for Unregulated Contaminant Monitoring Rule (UCMR)

Agency Version Date: 06/02/2022
Agency Update Frequency: Quarterly
Planned Next Contact: 01/15/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 10/21/2024

PFAS WQP: List of PFAS from Water Quality Portal

Agency Version Date: 10/08/2024
Agency Update Frequency: Quarterly
Planned Next Contact: 03/31/2025
Agency: U.S. Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 01/02/2025

PRISONS: List of Prison facilities

Agency Version Date: 05/03/2024
Agency Update Frequency: Varies
Planned Next Contact: 01/20/2025
Agency: DHS Homeland Infrastructure Foundation
Agency Contact: N/R
Most Recent Contact: 10/24/2024

RAATS: Listing of major violators with enforcement actions issued under RCRA. Includes administrative and civil actions filed by the EPA. This dataset is no longer maintained.

Agency Version Date: 09/23/2019
Agency Update Frequency: Varies
Planned Next Contact: 02/24/2025
Agency: Environmental Protection Agency
Agency Contact: N/R
Most Recent Contact: 11/28/2024

RADINFO: EPA regulated facilities with radiation and radioactive materials

Agency Version Date: 08/01/2019
Agency Update Frequency: Varies
Planned Next Contact: 02/12/2025
Agency: Environmental Protection Agency
Agency Contact: (202) 566-1667
Most Recent Contact: 11/18/2024

RMP: Facilities producing/handling/ process/ distribute/ store specific chemicals report plans required by the Clean Air Act

Agency Version Date: 06/14/2023
Agency Update Frequency: Monthly
Planned Next Contact: 02/11/2025
Agency: Environmental Protection Agency

(202) 566-1667
Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI
National Wetland Inventory
U.S. Fish and Wildlife Service
(703) 358-2171
Wetland Inventory for the United States

Airport landing facilities
Federal Aviation Administration
(866) 835-5322
Airport landing facilities

BASINS
Better Assessment Science Integrating point & Non-point Sources
U.S. Environmental Protection Agency
855-246-3642
Integrated geographical information system national watershed data and environmental assessment known as Better Assessment Science Integrating point & Non-point Sources

DIGITAL OBSTACLE
Obstacles of interest to aviation users
Federal Aviation Administration
855-379-6518
The Digital Obstacle File describes all known obstacles of interest to aviation users in the U.S. with limited coverage of the Pacific the Caribbean Canada and Mexico. The obstacles are assigned unique numerical identifiers; accuracy codes and listed in order of ascending latitude within each state or area by FAA Region.

EPICENTERS
National Geographical Data Center
National Geographical Data Center
303-497-6826
List of recent and historic earthquakes and information.

FLOOD DFIRM
National Flood Hazard Layer Database
Federal Emergency Management Agency
The National Flood Hazard Layer Database (NFHL) is a computer database that contains the flood hazard map information from FEMAs Flood Map Modernization program. These map data are from Digital Flood Insurance Rate Map (DFIRM) databases and Letters of Map Revision.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Report Cycle :	2019
Hazardous Waste Page Number :	10
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	ACTIVE C, ORGANIC SOLID CONTAMINATED ABSORB/ FILTER MATERIAL
Primary NAICS :	325199 - All Other Basic Organic Chemical Manufacturing
Source Code :	G08 - Removal of spent process liquids or catalysts (bulk removal of wastes from chemical manufacturing or processing, etc.)
Form Code :	W409 - Other organic solids (specify in comments)
Management Method :	H141 - The site receiving this waste stored/bulked and transferred the waste with no treatment or recovery (H010-H129), fuel blending (H061), or disposal (H131-H135) at that receiving site.
Generation Tons :	4.5305
Managed Tons :	0
Shipped Tons :	4.5305
Received Tons :	0
Receiver ID :	OHD093945293
Receiver State :	OH
Shipper ID :	OHD076784040
Shipper State :	OH
Waste Minimization :	A - Cont. initiative to reduce qty and/or toxicity
Waste Code List :	F003, F005
Waste Code Group :	F1_5 - F001-F005 combinations
Waste Generation Type :	N/R

Report Cycle :	2019
Hazardous Waste Page Number :	12
Hazardous Waste Sub-Page Number :	1
BR Form :	GM
Waste Description :	DIAZABICYCLOUNDECENE, EPIRED OUT OF SCPEC MATERIAL
Primary NAICS :	325199 - All Other Basic Organic Chemical Manufacturing
Source Code :	G11 - Discarding off-specification, out-of-date, and/or unused chemicals or products
Form Code :	W203 - Concentrated non-halogenated (e.g., non-chlorinated) solvent
Management Method :	H061 - Fuel blending prior to energy recovery at another site (waste generated either on-site or received from off-site)
Generation Tons :	0.01
Managed Tons :	0

Classification :	Large Quantity Generator

Description :

Handlers that generate 1,000 kg or more of hazardous waste during any calendar month; or generate more than 1 kg of acutely hazardous waste during any calendar month; or generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1 kg of acutely hazardous waste at any time; or generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Description of Incident :

WHILE DISTILLING 1,4-DIOXANE, ON OR ABOUT 10:00AM 9/13/08, THE CONDENSER FROZE UP FORCING VAPOR BACK THROUGH THE STILL INTO THE PRODUCTION FACILITY. THE REACTOR ROOM FILLED WITH VAPOR WHICH ESCAPED THE FACILITY THROUGH NATURAL VENTILATION. ABOUT 0400 9/14/08, THE RELEASE WAS DISCOVERED. THE STILL WAS SHUTDOWN AND REMAINING VAPOR WAS VENTED OUTSIDE THE FACILITY BY A CEILING FAN. ABOUT 3564 LBS OF MATERIAL WAS LOST FROM THE STILL AND ASSUMED TO BE RELEASED INTO THE ATMOSPHERE AS VAPOR. WIND STORMS CAUSED POWER OUTAGE ABOUT MIDDAY 9/14/08 LASTING UNTIL 9/18/08, WHEN RELEASE WAS REPORTED TO COMPANY MANGERS. ERRONEOUS ASSUMPTIONS OF HOW MUCH VAPOR WAS RELEASED INTO THE ATMOSPHERE WERE MADE INITIALLY, BUT CALCULATIONS PERFORMED ON 9/29/08 INDICATED NEARLY ALL OF MATERIAL WAS RELEASED OUTSIDE THE FACILITY.

Last Date in Agency List :	2015-12-23

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
Source Description :	All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
Source Description :	ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring. OSHA-OIS
Source Description :	RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

The RMP database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description :

The database that supports the Toxic Substances Control Act (TSCA) of 1976, which provides EPA with authority to require reporting, record-keeping and testing requirements, and restrictions relating to chemical substances and/or mixtures. Certain substances are generally excluded from TSCA, including, among others, food, drugs, cosmetics and pesticides. TSCA addresses the production, importation, use, and disposal of specific chemicals including polychlorinated biphenyls (PCBs), asbestos, radon and lead-based paint.

Hazardous Waste Summary

Waste Code / Name : D001 - IGNITABLE WASTE
D002 - CORROSIVE WASTE
D018 - BENZENE
D028 - 1,2-DICHLOROETHANE
D035 - METHYL ETHYL KETONE
D038 - PYRIDINE

Waste Code / Name : F003 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F005 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
U037 - BENZENE, CHLORO- (OR) CHLOROBENZENE
U044 - CHLOROFORM (OR) METHANE, TRICHLORO-

Hazardous Waste Summary

Waste Code / Name :	D001 - IGNITABLE WASTE D002 - CORROSIVE WASTE D009 - MERCURY D018 - BENZENE D021 - CHLOROBENZENE D028 - 1,2-DICHLOROETHANE D038 - PYRIDINE
Waste Code / Name :	F003 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES. F005 - THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES. U037 - BENZENE, CHLORO- (OR) CHLOROBENZENE

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

Source Description :

ICIS provides a database that, when complete, will contain enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Source Description :

RCRAInfo is EPA’s comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Waste Details

Waste Line Number :	1
Is DOT Hazardous :	Y
DOT ID Number :	UN1950
DOT Information :	RQ, UN1950, WASTE AEROSOLS, FLAMMABLE, (EACH NOT EXCEEDING 1 L CAPACITY) (EACH NOT EXCEEDING 1 LCAPACITY), 2.1, NONE (D001)
Non Waste Description :	N/R
Quantity :	125 Pounds
Quantity Tons, Acute, Non-Acute :	0.0625, 0, 0.0625
Quantity Kg, Acute, Non-Acute :	0, 56.689377
Quantity Tons, Haz, Non-Haz :	0.0625,
Quantity Kg, Haz, Non-Haz :	56.689377,
Management Method :	H040 - INCINERATION
Is EPA Waste :	Y
Federal Code :	D001, D005, D006, D007, D008, D035
State Code :	N/R

Waste Line Number :	2
Is DOT Hazardous :	N
DOT ID Number :	N/R
DOT Information :	N/R
Non Waste Description :	NONE, NON DOT REGULATED MATERIAL (FLUORESCENT BULBS), N/A, NONE, (UNIVERSAL WASTE-LAMPS)
Quantity :	650 Pounds
Quantity Tons, Acute, Non-Acute :	0.325, 0, 0.325
Quantity Kg, Acute, Non-Acute :	0, 294.78476
Quantity Tons, Haz, Non-Haz :	, 0.325
Quantity Kg, Haz, Non-Haz :	, 294.78476
Management Method :	H039 - OTHER RECOVERY OR RECLAMATION FOR REUSE
Is EPA Waste :	N
Federal Code :	N/R
State Code :	N/R

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
Source Description :	The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

FRS ***(cont.)***

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.

Source Description :

The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.

Source Description

Source Description :	AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

FRS ***(cont.)***

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. EPA ID: N/R

RCRA_NONGEN ***(cont.)***

Waste Code / Name :

F002 - THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
F010 - QUENCHING BATH RESIDUES FROM OIL BATHS FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
F011 - SPENT CYANIDE SOLUTIONS FROM SLAT BATH POT CLEANING FROM METAL HEAT TREATING OPERATIONS.
F012 - QUENCHING WASTEWATER TREATMENT SLUDGES FROM METAL HEAT TREATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.
P030 - CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED
P106 - SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)
U019 - BENZENE (I,T)
U043 - ETHENE, CHLORO- (OR) VINYL CHLORIDE

Corrective Action Summary

Date / Status / CA Event Description:

2009-05-01 (Active) CA070NO - DETERMINATION OF NEED FOR AN INVESTIGATION-INVESTIGATION IS NOT NECESSARY
2006-07-01 (Active) CA001 - ADDITIONAL INFORMATION NECESSARY [CATEGORY B] - INITIAL LOAD
1992-03-31 (Active) CA075LO - CA PRIORITIZATION-LOW CA PRIORITY
1992-03-12 (Active) CA225NR - STABILIZATION MEASURES EVALUATION-FACILITY NOT AMENABLE TO STABILIZATION
1992-02-10 (Active) CA050 - RFA COMPLETED
1992-02-10 (Active) CA070YE - DETERMINATION OF NEED FOR AN INVESTIGATION-INVESTIGATION IS NECESSARY

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Facility Summary

Program System ID :	OH0000001409040467
Facility Registry ID :	110000392254
EPA Region :	EPA Region 5 - IL, IN, MI, MN, OH, WI
SIC :	N/R
NAICS :	336412 - Aircraft Engine and Engine Parts Manufacturing
Facility Type :	N/R
Air Pollutant Class :	Minor Emissions
Air Operating Status :	Permanently Closed
Current High Priority Violation (HPV):	No Violation Identified
Local Control Region Name :	N/R
Last Date in Agency List :	2024-04-08

Air Pollutant Details

Program System ID :	OH0000001409040467
Pollutant :	VOLATILE ORGANIC COMPOUNDS (VOCS)
Substance Registry Services ID (SRS):	761346
Chemical Abstract Service Number :	N/R
Air Pollutant Class :	Minor Emissions

Program System ID :	OH0000001409040467
Pollutant :	FACIL
Substance Registry Services ID (SRS):	N/R
Chemical Abstract Service Number :	N/R
Air Pollutant Class :	Emissions classification unknown

Program System ID :	OH0000001409040467
Pollutant :	FACIL
Substance Registry Services ID (SRS):	N/R
Chemical Abstract Service Number :	N/R
Air Pollutant Class :	Minor Emissions

Air Violation History Details

HPV Day Zero Date :	N/R
HPV Resolved Date :	N/R
Program System ID :	OH0000001409040467
Activity ID :	N/R
Agency Type :	N/R
State Code :	N/R
Air Local Control Region Code (LCON):	N/R
Comp Determination UID :	N/R
Enforcement Response Policy :	N/R
Program :	N/R
Pollutant :	N/R
Earliest Determination Date of Federally Reportable Violation (FRV):	N/R

Site Details

Date Form Received by Agency :	2006-02-23
EPA ID :	OHD000721456
Mailing Address :	201 W CRESCENTVILLE ROAD, CINCINNATI, OH 45246
Contact :	MARK R WANEK
Contact Address :	N/R
Contact Country :	US
Contact Telephone :	513-679-2518
Contact Email :	mark.wanek@ge.com
EPA Region :	05
Land Type :	Private
Source Type :	Annual/Biennial Report updated with Notification
Classification :	Large Quantity Generator

Description :

Handlers that generate 1,000 kg or more of hazardous waste during any calendar month; or generate more than 1 kg of acutely hazardous waste during any calendar month; or generate more than 100 kg of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month; or generate 1 kg or less of acutely hazardous waste during any calendar month, and accumulate more than 1 kg of acutely hazardous waste at any time; or generate 100 kg or less of any residue or contaminated soil, waste or other debris resulting from the cleanup of a spill, into or on any land or water, of acutely hazardous waste during any calendar month, and accumulated more than 100 kg of that material at any time.

Last Date in Agency List :	2024-03-13

Owner/Operator Summary

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
AFS contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description : The Emission Inventory System (EIS) maintains an inventory of large stationary sources and voluntarily-reported smaller sources of air point pollution emitters. It contains information about facility sites and their physical location, emission units, emission processes, release points, control approaches, and regulations. Facility inventory data are kept separate from the emissions data and have stable identifiers to improve continuity from year to year and to help identify duplicate or missing facilities.
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description : RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : Minnesota's permitting, compliance, and enforcement information management system.
The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Description of Events :

XPO Logistics Terminal XCN reported UN1760 "Ferrous Chloride" released 30-gallons impacting the trailer floor and asphalt yard due to the metal cage pinching the 275-gallon poly tote. ERTS dispatched First Call Environmental to perform all onsite clean up operations. First Call personnel arrived onsite and confirmed approximately (30)-gallons of product released affecting half of the trailer floor/asphalt below. First call transferred all salvageable product into a new tote and collected and containerized all clean-up debris into three (3) 55-gallons metal drums. Contractors departed the site with all waste.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database.

Source Description : The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.
RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.
TRIS is a publicly available EPA database reported annually by certain covered industry groups, as well as federal facilities. It contains information about more than 650 toxic chemicals that are being used, manufactured, treated, transported, or released into the environment, and includes information about waste management and pollution prevention activities.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description : AIR contains compliance and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Source Description

Source Description :

RCRAInfo is EPA's comprehensive information system that supports the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984 through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA. RCRAInfo also supports generation of the National Hazardous Waste Biennial Report. All generators and treatment, storage, and disposal facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years to support creation of the Biennial Report.

Source Description

Source Description :	AQS contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations. The OH-CORE database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

CERCLIS NFRAP: The CERCLIS sites with No Further Remedial Action Planned from the CERCLIS program database. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 03/25/2024

CERCLIS-HIST: The CERCLIS program database contains information on the assessment and remediation of federal hazardous waste sites. The Environmental Protection Agency decommissioned the CERCLIS data in 2014. The last update was November 12, 2013.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 03/25/2024

EPA SAA: Listing of Sites with Superfund Alternative Approach Agreements.

Agency Version Date: 12/29/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/20/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 800-424-9346
Most Recent Contact: 03/26/2024

FEDERAL FACILITY: Sites where Federal Facilities Restoration and Reuse Office (FFRRO) arranged cleanup for Base Closure and Property Transfer at Federal Facilities

Agency Version Date: 12/28/2023
Agency Update Frequency: Varies
Planned Next Contact: 06/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8712
Most Recent Contact: 03/25/2024

SEMS_8R_ACTIVE SITES: The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. NPL sites include latitude and longitude information. For non-NPL sites, a brief site status is provided.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 03/25/2024

SEMS_8R_ARCHIVED SITES: The Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Agency Version Date: 12/28/2023
Agency Update Frequency: Quarterly
Planned Next Contact: 06/19/2024
Agency: U.S. Environmental Protection Agency
Agency Contact: 703-603-8867
Most Recent Contact: 03/25/2024

Q3 Flood Data

HYDROLOGIC UNIT
Hydrologic Unit Maps
USGS
The United States Geological Survey created a hierarchical system of hydrologic units originally called regions, sub-regions, accounting units, and cataloging units. Each unit was assigned a unique Hydrologic Unit Code (HUC). As first implemented the system had 21 regions, 221 subregions, 378 accounting units, and 2,264 cataloging units. Over time the system was changed and expanded. As of 2010 there are six levels in the hierarchy, represented by hydrologic unit codes from 2 to 12 digits long, called regions, subregions, basins, subbasins, watersheds, and subwatersheds. The table below describes the system's hydrologic unit levels and their characteristics, along with example names and codes.

WETLANDS NWI
National Wetland Inventory
U.S. Fish and Wildlife Service
